SUMMARY

Experienced AWS DevOps Engineer / Site Reliability Engineer with **7+ years** of IT experience in designing, implementing, and managing secure, scalable, and highly available cloud infrastructure on Amazon Web Services (AWS). Skilled in CI/CD automation, Infrastructure as Code (Terraform), Kubernetes (EKS), Docker, GitHub Actions, Jenkins, and DevOps/SRE best practices to ensure reliable application delivery, operational excellence, and continuous integration and deployment.

TECHNICAL SKILLS

Cloud Platforms: Amazon Web Services (EC2, EKS, IAM, VPC, ALB/ELB, Auto Scaling, Route 53, S3, CloudWatch, ECR, ACM, RDS, Route53, KMS, CloudFront)

DevOps & CI/CD: Jenkins, GitHub Actions, GitLab CI/CD, Git, Docker, Kubernetes (EKS), Helm, Argo CD (GitOps)

IaC & Config Mgmt: Terraform, Ansible

Security & Quality: SonarQube, Trivy, OWASP, DevSecOps practices

Monitoring & Observability: Prometheus, Grafana, CloudWatch, ELK Stack

Scripting: Bash, Python (Boto3), Groovy (DSL), YAML

PROFESSIONAL EXPERIENCE

Movate Technologies

Sep 2024 – Present

Role: Senior DevOps Engineer / Site Reliability Engineer (SRE)

Client: Guardant Health – Precision Oncology Cloud Platform

Tools Ecosystem: AWS, Kubernetes, Docker, Terraform, Helm, Argo CD, GitHub Actions, Prometheus, Grafana, Alertmanager, SonarQube, Trivy, Python, Bash, Linux, Jira.

The **Guardant Healthcare** application is a cloud-native healthcare platform that enables secure processing and analysis of genomic data for cancer diagnosis, treatment selection, and disease monitoring on AWS with a microservices architecture.

- Managed and maintained production workloads on Amazon EKS, ensuring high availability, scalability, and reliable application deployments following SRE best practices.
- Implemented GitOps deployment workflows using Argo CD to automate Kubernetes application deployments, enabling faster releases and simplified rollback capabilities.
- Participated in production incident management, troubleshooting, and Root Cause Analysis (RCA) to improve system reliability and minimize service disruptions.
- Built and maintained CI/CD pipelines using GitHub Actions, integrating SonarQube and Trivy for automated code quality analysis and container image vulnerability scanning.
- Configured and managed Prometheus, Grafana, and Amazon CloudWatch for infrastructure and application monitoring, proactive alerting, and performance analysis.
- Provisioned and managed AWS infrastructure using Terraform, including Amazon EKS, EC2, IAM, VPC, ALB, Route 53, S3, and Auto Scaling across multiple environments.
- Automated infrastructure provisioning, application deployments, and operational tasks using Terraform, Ansible, Python, and Bash to improve deployment consistency and reduce manual effort.
- Collaborated with Development, QA, and Security teams throughout the SDLC to deliver secure, scalable, and highly available cloud-native applications.

Unify Technologies

Nov 2021 – Aug 2024

Role: Senior DevOps Engineer

Client: IDFC Bank – Enterprise Document Portal (EDP)

Enterprise Document Portal (EDP) is a secure, centralized document management platform developed for IDFC Bank to streamline document storage, retrieval, version control, and approval workflows. It integrates with core banking

systems to improve operational efficiency, ensure regulatory compliance, and reduce manual processing through workflow automation.

- Developed and maintained CI/CD pipelines using Jenkins to automate application build, testing, artifact generation, and deployment across multiple environments.
- Automated server provisioning and application configuration using Ansible playbooks, reducing manual configuration efforts and improving deployment consistency.
- Provisioned and managed AWS infrastructure using Terraform, including EC2, VPC, IAM, Security Groups, ALB, S3, and RDS.
- Containerized enterprise applications using Docker and deployed them on Kubernetes clusters using Helm charts for simplified release management.
- Configured Jenkins integration with Git and Maven to automate code checkout, build, unit testing, and artifact publishing.
- Implemented application monitoring and infrastructure dashboards using Prometheus and Grafana to monitor system health and resource utilization.
- Managed Kubernetes workloads including Deployments, Services, ConfigMaps, Secrets, and Ingress resources while supporting application upgrades and environment maintenance.
- Worked closely with developers and QA teams to resolve deployment issues, support release activities, and ensure smooth application delivery throughout the SDLC.

Quest Global

Jun 2019 – Oct 2021

Role: Associate Software Engineer

Client: Reliance Jio – NB-IoT (Narrowband Internet of Things)

Low Power Wide Area Network (LPWAN) initiative delivering secure, energy-efficient connectivity for large-scale IoT devices supporting smart metering, asset tracking, and industrial IoT applications. “`latex id="nbiot-points"`”

- Supported CI processes by configuring and maintaining Jenkins jobs for automated application builds and deployments.
- Managed source code repositories using Git, including branching, merging, version control, and release management.
- Developed Shell scripts to automate routine administrative tasks, deployment activities, and log management on Linux servers.
- Automated application configuration and deployment using Ansible playbooks across Development and Test environments.
- Performed Linux server administration, including package installation, user management, process monitoring, and troubleshooting.
- Collaborated with development and testing teams to support application releases, environment setup, and deployment validation.
- Monitored application logs and system performance to identify issues and assist in troubleshooting production and pre-production environments.
- Participated in software release activities, environment maintenance, and defect resolution to ensure smooth application delivery.

EDUCATION

- B.Tech, Electrical and Electronics Engineering (EEE) – JNTU-Anantapur - 2014

ADDITIONAL INFORMATION

- **Languages:** Telugu, English, Hindi
